EDUCATION

2023 – Present

Tharaka University

Bachelor of Science in Computer Science

My time at Tharaka University has been a journey of growth, leadership, and discovery. While pursuing a Bachelor's degree in Computer Science, I took an active role in student leadership, serving as the Student Representative for the Faculty of Physical Engineering and Technology (FPET). I also held a leadership role in the Christian Union (CU), which helped me develop strong communication, teamwork, and mentorship skills. University life has shaped my passion for technology, driven me to self-learn web development and design, and given me the confidence to pursue creative and technical projects with purpose.

2019-2022
Kiurani High School

I attended Kiurani High School from 2019 to 2022, where I completed my Kenya Certificate of Secondary Education (KCSE). During my time there, I served as a Christian Union (CU) Leader, a role that helped me grow in leadership, public speaking, and spiritual guidance.
Although computer studies were not part of my curriculum, my interest in technology began shortly after completing high school. This passion led me to explore web development, programming, graphic design, and video editing—skills I continue to develop at the university level.
